Nimo Paediatric Manual Tilt in Space

Toileting, Bathing and Showering Chair

The Nimo Paediatric height adjustable chair comprises of a Base Transporter and cradle to allow the child to be transported from room to room. The Base Transporter comes complete with a commode and a padded footboard. The padded footboard is adjustable and is attached to the pivot bed which allows the chair to be tilted to a suitable angle to suit the child. The cradle is easy to detach from the Base and can be placed directly into a bath making bathing safe and secure. It comes complete with a 4 point lap belt, padded side arms and aperture.

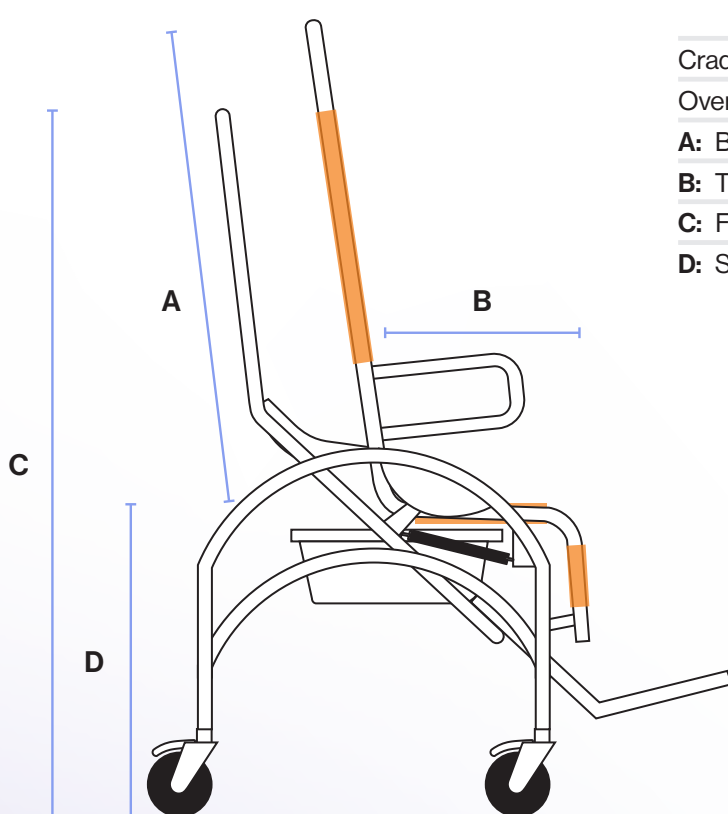

Construction: Stainless Steel, powder coated frame. 100% Polyester mesh with an antibacterial coating. The mesh is easy to remove and can be placed into a washing machine.

Accessories: Head supports, Bib harnesses and Pommels are some of our accessories.

Manoeuvrable: 4 brake castor wheels allow the chairs to be transported with ease.

Adjustable: The Base Transporter can be adjusted in height by 100mm. The padded footboard and side arms are adjustable.

Maximum user weight: 63.5kg or 10 Stone.
